

## Large-screen control with the graphic controller – the IP-based large screen visualisation

Whether computer, TV images, analogue or digital cameras: The graphic controller records all video signals simultaneously and spreads them out at any position and in any scale on the large display wall.

- Image content is streamed and distributed in a decentralised manner via the IP network
- IP cameras are encoded directly in the graphic controller
- Capture agent for IP image transmission
- Extensive operating software

**REQUEST A NON-BINDING OFFER**

## The IP-based graphic controller

The well-proven graphic controller from JST sets a new standard for all applications in the field of video wall control. It offers unparalleled bandwidth and thus guarantees optimum image quality.

## Experience the graphic controller in operation!

The graphic controller integrates itself into your IT infrastructure and “streams” the image data via your IP network to the large-screen system.
