Monitoring surveillance for your control center with PixelDetection®

PixelDetection® supports you when too many surveillance monitors overlay your workplace. With PixelDetection® **you get the right alarm at exactly the right moment** and always keep track. Proven for many years and repeatedly awarded, PixelDetection® is also called the "artificial eye of the operator".

- **Effective:** Monitoring the colors and texts in your applications
- **Space-saving:** No need for many additional monitoring displays
- **Safe:** Independent of the IP network – no software required on your systems
- **Helps with concentration:** The alarm console reports to the employee – not vice versa

PixelDetection® again awarded as "CertifiedTool" for control rooms

CertifiedTool stands for excellent software solutions since 2003! Unlike most other seals of approval for software solutions on the market, the Serview CertifiedTool *award is* free. This means that you cannot buy this award with any money in the world. Manufacturers of a software solution must meet the criteria of

Serview and demonstrably fulfill the very high requirements – only then will the award be granted.

What clients report about their experience with JST – Jungmann Systemtechnik®

| "This used to be just an office; today we can really call it a state-of-the-art control room."

Karl Rubsch
Responsible for the control room engineering at the Munich Airport

TO REFERENCES

| "Things are going great. The system has been very well received by colleagues."
Frank Nachtsheim

Plant Manager of MVA Bonn

TO REFERENCES

spenner zement

> "The whole package was really coherent, and we also really liked the dedication of the Jungmann employees."

Dr. Heinrich Sievers
Production Manager

TO REFERENCES

> "The entire collaboration we have had with JST can only be described as very professional – from perfect preparation to the end result."

Kai Timmermann
Head of the Power Supply Control Center
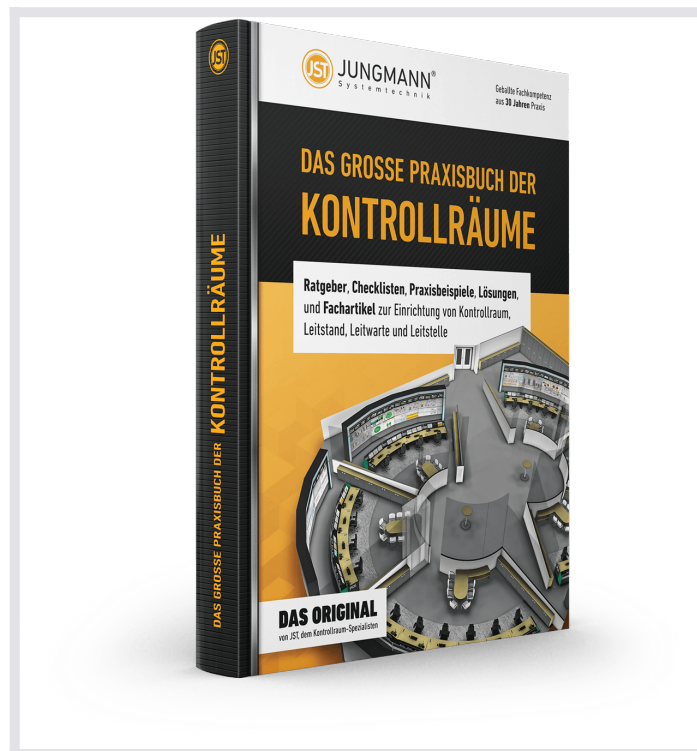

TO REFERENCES

> "I have come to appreciate the JST employees as reliable and competent partners from the planning phase to the project completion. This has also been confirmed to this day for the subsequent customer support.

Bernhard Apitzsch
SD - Service & Operation
