

## What will you experience in the control room simulator?

**Optimal display** of your applications on different DisplayWalls

**More flexibility** and easier operation of all your systems with MultiConsoling<sup>®</sup> and myGUI<sup>®</sup>

**Better overview** and faster alarm clearance with JST CockpitView<sup>®</sup>

**React faster** with PixelDetection<sup>®</sup>

**More security** through JST-myLogin<sup>®</sup> and proven failover concepts

Stratos X11<sup>®</sup> standing/sitting operator's console, JST TacticTable<sup>®</sup> and innovative ergonomic, lighting and acoustic concepts for **fatigue-free and concentrated work**

**Maximizing performance & flexibility** – with the interactive JST TacticTable<sup>®</sup>

**A look into the future** with augmented reality and speech and gesture control

## Go with us on an adventure tour into the world of modern technology

### Let's go on a large display hunt

Take a look into the future and take a close look at the latest large-display technology in the control room simulator. Whether **LED rear-projection cube, monitor wall, Videowall, large-format system** or **DisplayWall** – you can expect technology of the highest level, naturally also in terms of software.

Our **JST-PixelDetection<sup>®</sup>** software shows you the automated alarm activation on the large display wall. The alarm and management tools you use are only displayed when they require your attention. Reaction times are drastically reduced!

## Enjoy the new freedom

In the control room simulator, you can actively test the flexible **MultiConsoling**<sup>®</sup> workplace circuitry yourself and experience its advantages first hand. A win for every workplace! Thanks to MultiConsoling<sup>®</sup>, **fewer screens** are needed, employees choose their seats according to the **free seating principle**, and teamwork is encouraged. The computers are located **securely and air-conditioned** in a remote technical room. In addition, MultiConsoling<sup>®</sup> enables **interconnection between workstations and large-format systems**. You control the entire system via the intuitive **myGUI**<sup>®</sup> user interface.

## Discover unimagined comfort

Try out the special control room furniture of JST: the Stratos X11® control center desk with stand-sit height adjustment for sophisticated demands of shift operations, operator chairs for 24/7 continuous use, acoustic large-screen wall cladding and ceiling systems, the Opal X11® acoustic ceiling sail, control room lighting concepts, crisis room solutions, conference desk with various PC connection interfaces, meeting point and much more.

Ergonomic aspects have top priority for JST. We develop the control rooms of the future – by people for people.

## The team player in the control room

With the JST TacticTable® you experience more performance & flexibility in your control center. An interactive multi-touch screen with smart technology – designed for professional use. The ultimate solution for team-based decision making. Access all control room sources and processes. Use flexible gesture control and secure handling with the intuitive myGUI® interface. Create new perspectives for communication in your control center with the JST TacticTable®.
