

Client:

Kategorie: Traffic control center, Critical infrastructures.

Monitoring in a class of its own!

German Aerospace Center (DLR): Central Monitoring Control Center of JST

Central Monitoring control center with a view to a Cube large-screen system.

The German Aerospace Center (DLR) is the Federal Republic of Germany's research center for aerospace, energy and transport. His extensive research and development work is integrated into national and international cooperations.

In addition to its own research, DLR is responsible for the planning and implementation of German space activities as a space agency on behalf of the German government. As project management agency, DLR also coordinates and is responsible for the technical and organisational implementation of projects funded by various federal ministries.

REQUEST AN OFFER WITHOUT OBLIGATION

The components used in this project:

MultiConsoling® System – complete control room system for workplace, monitor wall and other systems

myGUI® user interface - in the intuitive 3D design of your control room for maximum user comfort

Planning

Computer relocation
